

AviationDW

AviationDW is a managed data warehouse, tailor-made for use with your backend system, e.g. AMOS.

AviationDW greatly simplifies KPI creation based on MRO System data. To this end, AviationDW provides easy-to-understand database schemes allowing business end-users to explore data without implementing complex logic.

The application favors the use of existing in-house reporting and visualization tools. Simply connect to AviationDW with common solutions like Microsoft Power BI, Tableau, AWS QuickSight or other BI tools to directly benefit from existing knowledge and capabilities.

AviationDW in collaboration with one of the aforementioned BI tools gives you the ability to visualize data in an interactive intuitive way to delve deeper into the data with a targeted approach.

- Simplifies KPI creation based on MRO system data
- Export is controlled by the user
- Processing takes place in the cloud
- Supports encrypted connections
- Can be accessed by any BI tool
- Visualize data in an interactive intuitive way
- Prepare raw backend MRO system data for easy access
- Well documented database schema
